Leaders In Sports Infrastructure

**Sports do not
build character.
They reveal it.**

Profile

We have combined both art and science in providing top quality sport court surfaces and infrastructure, making us leaders in our field. A combined experience of over 80 man-years, and our focus on innovation and passion for quality makes us one of the most respected and trusted names in the industry. We have successfully delivered over 3000 playing surfaces across India and the sub-continent.

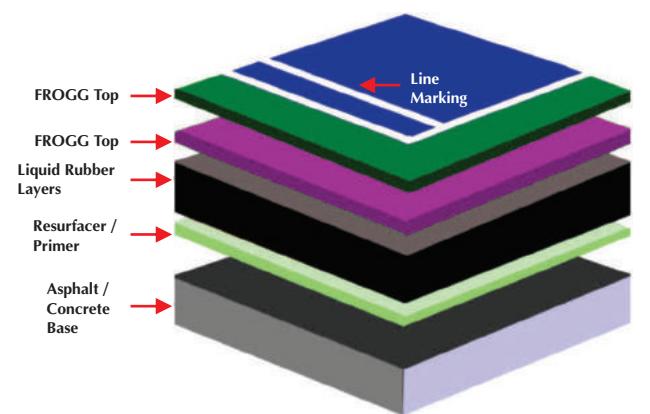

We provide solutions which are affordable to build, enjoyable to play, easy to maintain, and fit with the surrounding environment. Right from school and college grounds, to high-end sports complexes for clubs and top international tournaments, we ensure every finished facility provides the highest levels of athletic comfort and performance. This includes sports infrastructure for tennis, basketball, badminton, volleyball, handball, netball and squash courts. We also create artificial grass surfaces for most sports as well as for landscaping. Our services include major associated civil works like asphalt base, chain link fencing, lighting etc., thus offering our clients a complete turnkey solution.

You are your
only limit.

Products

FROGG™ ACRYLIC SPORTS SURFACES

Our leading product is the Frogg™ outdoor synthetic surface for tennis, basketball, badminton, and volleyball. We are best known for high-performance, comfortable synthetic sports surfaces that serve a variety of professional, collegiate, and recreational sports. Each sport surface is tailored to meet the needs of our customers. We have delivered over 1500 such sports surfaces across the country.

FROGG is an all-weather acrylic coating system with or without rubber crumb in-filled in situ. It is formulated to provide shock absorption and a sure grip for maximum player comfort. The surface is suitable for most outdoor sporting activities, with special emphasis on tennis, where ball bounce is of prime importance. Designed to be laid over both asphalt and concrete bases, Frogg™ is available in a variety of vibrant colours.

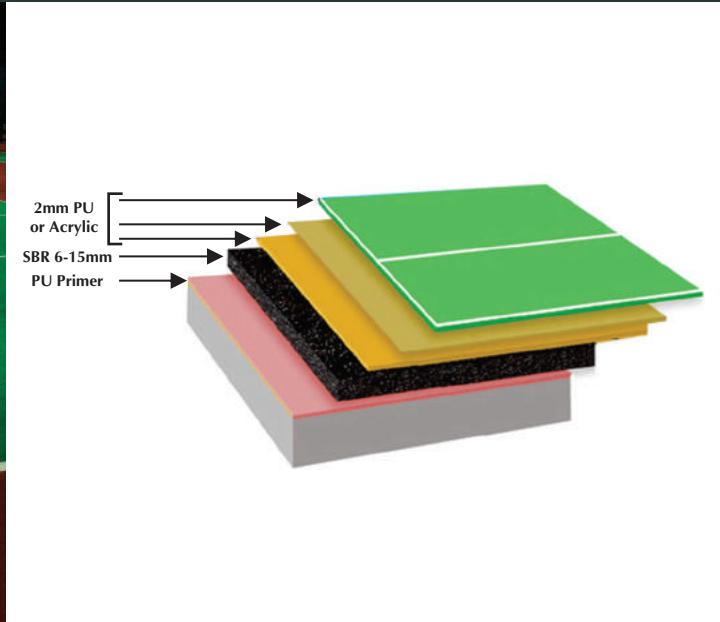

The Frogg™ system is designed to be a low maintenance product and requires minimum user intervention. However, it is important that the court be kept free of dust and other loose particle matter in order to maximize the life of the court. Frogg™ has a high-performance acrylic formulation to deliver sharp line markings and retain brightness over the years. An ISO 9001:2008 Certification and classification by the International Tennis Federation (ITF) have contributed to make Frogg™ a leader in the field, and the choice of prestigious tournaments across the country. Though the preferred base for FROGG is asphaltic, we have an excellent system for concrete too.

It never gets easier.
You just get better.

Products

FROGG™ CUSHION SPORTS SURFACES

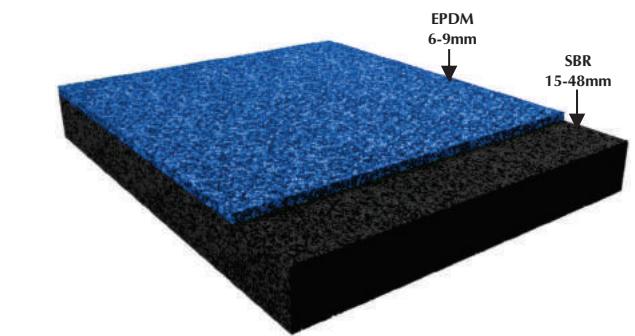

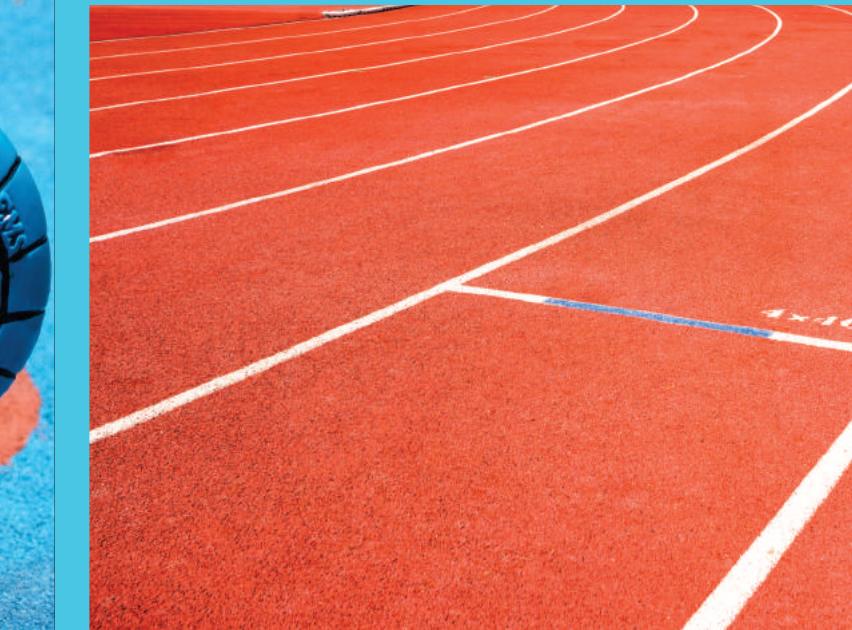

We manufacture durable acrylic surfaces with resilient multi-layered cushion designed to reduce the pressure put on an athlete's body from vigorous game play. The advanced technology is truly special because, despite the increase in comfort and safety, there is absolutely no compromise on the natural bounce of the game. In our endeavor for constant innovation, we have introduced a revolutionary sports surface system which will minimize the injury risk by 50%. Thickness options and color combinations can be customized to suit the needs of clients. This system is being successfully used for indoor and outdoor sports like tennis, badminton, volleyball and cricket practice pitch.

Play is the brain's favourite way of learning.

Products

PLAY FLOORINGS / TRACKS

When it comes to children, it is imperative to keep their well-being assured, especially when they are at play. We appreciate this need for safety and offer an excellent line of safety surfacing for playgrounds with protective shock absorbing qualities and outstanding comfort. Our EPDM / SBR In Situ Playground Flooring is a seamless surfacing system. The thickness of the base is dependent on the safety fall height requirement. Colourful designs and shapes may be incorporated into this process. A wear layer can easily be installed directly over an existing concrete or asphalt area, normally with little or no prior treatment to the existing surface. Because the system is installed by a "wetpour" process, the finished surface effectively becomes one large mat covering the entire playground area without any problem joints.

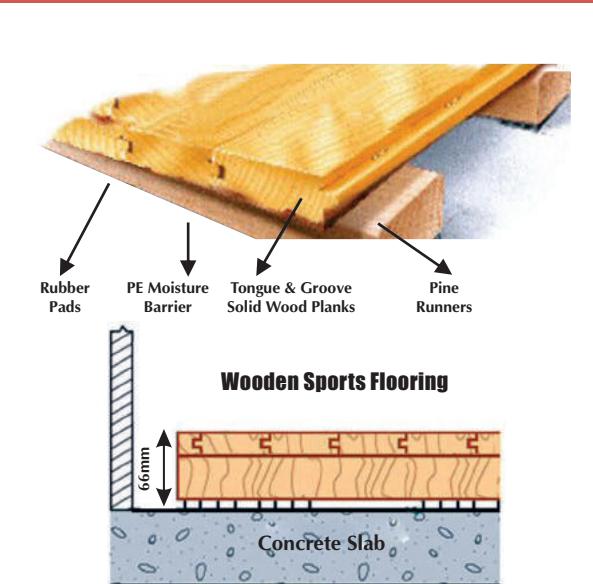

This same system can be used for jogging and athletic tracks, providing sure footing and superior surface which is easy on the body.

**The harder the battle,
the sweeter the victory.**

Products

SQUASH COURTS & WOODEN FLOORINGS

We are committed to building top-class and highly serviceable squash courts. Our comprehensive full-service solution includes the design, materials and construction of the entire project to ensure that the squash court meets the highest standards in quality and safety. We implement the Epoxy based hard plaster, maple/teak wooden flooring, glass back walls, and lighting systems. All our systems conform to WSF standards. We have completed more than 150 turnkey projects for Squash Courts apart from installation of sports wooden floorings at various sites.

The same flooring system is also widely used for a number of indoor sports such as badminton and basketball, apart from multi-purpose areas.

Winning isn't everything,
but wanting to win is.

Products

SPORTS GRASS

Synthetic grass with silica and rubber crumb in-fill

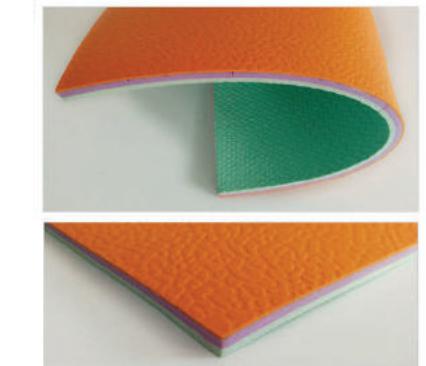

We supply and install top notch, high quality sports grass turfs that offer a balanced and forgiving playing field for a variety of sport applications and multipurpose use. Inspired by nature, our athletic turf ensures natural ball performance while maximizing every player's movements. Enhanced durability allows our turf to consistently perform under the most rigorous conditions. We have a multiple range of curled cricket practice pitch turfs, multi-sport fibrillated turfs which are regularly used for sports like tennis & volleyball. We offer a wide choice of soccer & hockey grass with options of FIFA & FIH approved turfs.

**Victory is in having done
your best. If you've done
your best, you have won.**

Products

PVC SPORTS FLOORING

Indoor & Outdoor: Having the right sport court floor plays a significant role in the quality of play and safety for athletes. Our PVC Vinyl flooring is an ideal surface for Indoor sports which offers high levels of performance, comfort and safety. These are skin-burn free surfaces which reduce the fall temperature by 25% resulting in much lesser friction injuries. We offer a wide range of vinyl floorings with varied thickness and with the option of BWF approved systems.

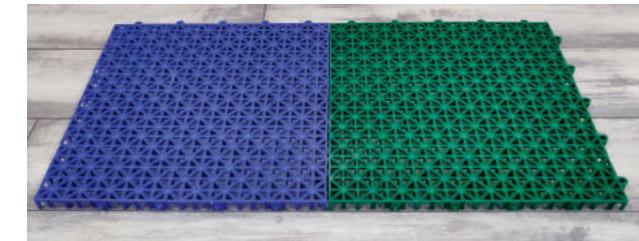

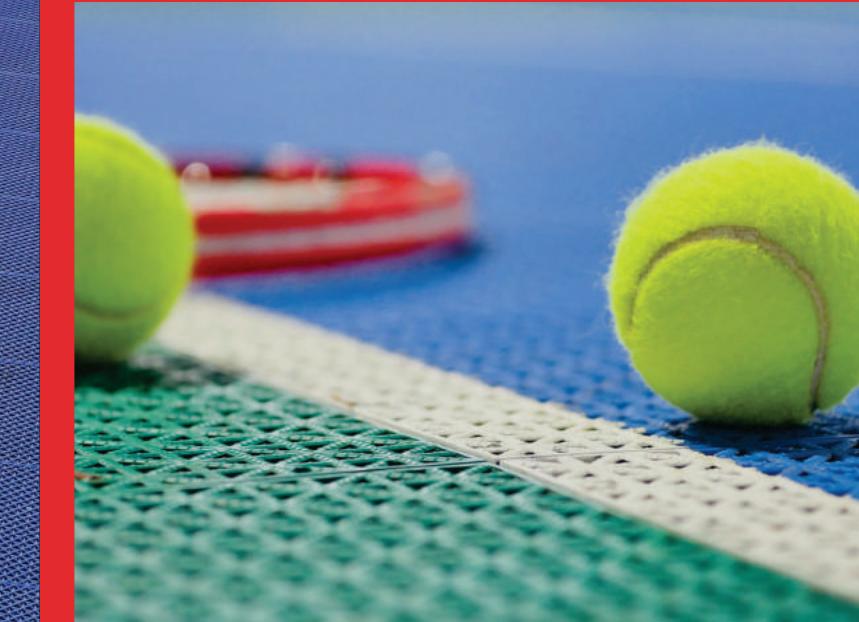

Until recently, PVC flooring was available for indoor use only, as it was unable to withstand heat and moisture. However, we now present a range of flooring which can be laid straight on your outdoor cemented courts and is not affected by extreme heat or rain. So confident are we of this product that we offer an unprecedented 3 years warranty on the product. This is an exclusive showcase product which will transform the look of the area while also providing the players an excellent surface and an unprecedented level of comfort in outdoor sports.

**You were born to be a player.
You were meant to be here.
This moment is yours.**

VERSATILE

Interlocking Modular Tiles: Frogg Sports Infra offers high quality innovative products which are popular with sportsmen and commercial users. Interlocking tiles resemble jigsaw puzzle pieces and fit together seamlessly. Versatile is a HDPP interlocking modular tile, which is porous and non-slip. It is ideal for poolsides, balconies, rooftops as well as for several sports like tennis, badminton, volleyball, racquetball, futsal, roller hockey, and aerobics.

It is a free floating and self-draining surface which provides superior traction for player performance. These modular tiles function well both indoors and outside and can withstand UV light, extreme temperatures and heavy loads. They are easy to install and maintain. Our interlocking modular tiles are perfect for home and commercial use. Come, explore our wide selection of tiled flooring solutions.

If it doesn't challenge you, it won't change you.

Products

PERIPHERALS

For over 20 years, Frogg Sports Infra has been providing turnkey solutions covering all aspects associated with a sports court/arena, which includes fencing, lighting, net poles & cleaning accessories. We offer Davis Cup standard tennis nets posts, SS and MS badminton posts, MS Volleyball posts with antennae, boom basketball posts with acrylic sheet and dunking rings. Our fencing system conforms to the global standard of height for fencing around the courts. We offer lighting options with 400W Metal Halide or 200W LED lights installed on metal poles of varying heights. We also offer cleaning accessories like imported rain shuttle/water pusher and sponge rollers which are very effective in ensuring longevity of the playing surfaces.
